TOWN WARRANT

STATE OF NEW HAMPSHIRE

To the inhabitants of the town of Newport qualified to vote in town affairs:—

You are hereby notified to meet at the Town Hall in said town of Newport, on the second Tuesday of March next, at 9.00 o'clock in the forenoon to act upon the following subjects, namely:

Article 1. To choose three Selectmen, Town Clerk and Town Treasurer for the year ensuing.

Art. 2. To choose a Collector of Taxes, and all other necessary town officers, agents and committees for the year ensuing.

Art. 3. To hear the reports of the Selectmen, Town Treasurer, Auditors, Agents and Committees heretofore chosen, and pass any vote relating thereto.

Art. 4. To raise and appropriate such sums of money as may be necessary for the payment of the town debt and defraying the interest thereon for the year ensuing and pass any vote relating thereto.

Art. 5. To raise and appropriate such sums of money as may be necessary for the payment of town charges, for the maintenance of the poor, for cemeteries, parks, commons and water works, and to improve the same and pass any vote relating thereto.

Art. 6. To raise and appropriate such sums of money as may be necessary for the support of schools for the year ensuing.

Art. 7. To see if the town will vote to ask for state aid for the purpose of making permanent improvements on the highways, and raise and appropriate the necessary amount of money therefor, and pass any vote relating thereto.

Art. 8. To raise and appropriate such sums of money as may be necessary for the laying out of highways and building and repairing the same, and for building and repairing bridges, and pass any vote relating thereto.

Art. 9. To see what sums of money the town will vote to appropriate, or raise and appropriate, for the purpose of building and repairing sidewalks in Newport village, and pass any vote relating thereto.

Art. 10. To see what sums of money the town will vote to raise and appropriate for the purpose of lighting the streets in Newport village and elsewhere about town, for installing new lights in town and the maintenance of the same and pass any vote relating thereto.

Art. 11. To see if the town will vote to appropriate the sum of \$100 to defray the expenses of Memorial day exercises and pay the same to the quartermaster of Fred. Smyth Post No. 10, Department of New Hampshire, G. A. R., and pass any vote relating thereto.

Art. 12. To see if the town will vote to approve the placing of a Soldiers' Monument on the common and raise and appropriate a sum of money towards the expense and appoint a committee to co-operate with Fred. Smyth Relief Corps No. 7, in procuring and erecting the same and pass any vote relating thereto.

Art. 13. To see if the town will vote to macadamize that part of Main street not already macadamized from the present macadam on North Main street to the gravel road at the hydrant on South Main street, raise and appropriate money for the same, and pass any vote relating thereto.

Art. 14. To see if the town will vote to macadamize Park street in Newport village, raise and appropriate money for that purpose and pass any vote relating thereto.

Art. 15. To see what action the town will take with reference to establishing a common or park to be used for a play ground in said Newport, what sum of money it will raise for the same, and pass any vote in relation thereto.

Art. 16. To see if the town will vote to appropriate the sum of \$350 for the support of the Newport Cadet Band, to be paid at the discretion of the Selectmen to Fred Cutts, treasurer of the band, providing the band gives a series of open air concerts during the summer months and pass any vote relating thereto.

Art. 17. To see if the town will vote to authorize the Selectmen and Treasurer to borrow money on the notes of the town in anticipation of taxes, fix the amount and pass any vote relating thereto.

Art. 18. To see if the town will vote to authorize any discount, and if so how much, on taxes paid before certain dates and pass any vote relating thereto.

Art. 19. To see if the town will vote to employ a Police Officer who shall devote his entire time to the duties of the office, appropriate money for the same and pass any vote relating thereto.

Art. 20. To see if the town will vote to replace in part the one and one-fourth inch cement lined pipe on Maple street, with larger cast iron pipe and extend the line to the junction with Bradford road, and from that point extend a smaller pipe to Broad View, so called, and to any other point and pass any vote relating thereto.

Art. 21. To see if the town will ratify the act of the Sewer Commissioners in the construction of a line of sewer pipe north of

Pleasant street on the so called ball grounds, this line being connected with the Pleasant street sewer, and to see if the town will authorize the Sewer Commissioners to construct a flush tank at the head of that line. To see if the town will authorize the sewer commissioners to construct flush tanks on or near Summit Road, also on Maple street, or construct any other sewer, and pass any vote relating thereto.

Art. 22. To see if the town will ratify the action of the Sewer Commissioners, in which they laid a line of sewer pipe from a point about two hundred and twenty-five feet south of Sunapee street, along Cross and Canal streets, and thence to the river. Also to see if they will authorize the Sewer Commissioners to extend this line of sewer pipe farther north and construct a flush tank connecting with the same and pass any vote relating thereto.

Art. 23. To see if the town will vote to extend the water system from Belknap Avenue along Pine street to the residence of Fred Gonyea and pass any vote relating thereto.

24. To see if the town will vote to enlarge the present engine house, raise and appropriate money for the same and pass all necessary votes relating thereto.

Art. 25. To see if the town will vote to increase the pay of the Firemen of the town.

Art. 26. To see if the town will vote to appropriate the sum of \$150 to maintain two brood stations for the purpose of growing square-tailed speckled brook trout to stock the brooks of Newport and pass any vote relating thereto.

Art. 27. To see if the town will vote to choose a committee to take into consideration the advisability of changing, modifying or enlarging the street lighting system as now existing in Newport village and pass any vote relating thereto.

Art. 28. To see if the town will vote to extend the electric light line by the addition of two more incandescent lights on Oak street and pass any vote relating thereto.

Art. 29. To see if the town will vote to celebrate Old Home Day the present year, raise and appropriate money for the same and pass any vote relating thereto.

Art. 30. To see if the town will vote to license moving picture shows in this town and pass any vote relating thereto.

Art. 31. To transact any other business that may legally come before said meeting.

Given under our hands and seals at Newport on this 25th day of February, A. D., 1911.

Respectfully submitted,

R. E. BARTLETT, Road Agent.

WEST SIDE TRUNK LINE OF HIGHWAY IN NEWPORT

The building of this road was contracted by the town at cost, and R. E. Bartlett was appointed Agent for the town to carry out the contract. Work was begun on the north end near the Croydon line April 10, and was completed April 26.

The work here was mostly building bank walls, filling, and lengthening the large culvert near S. A. Stockwell's.

A change from the first plan made this work more expensive than was anticipated. Work was commenced on the Goshen road May 10, and continued with an intermission of three weeks in July until Oct. 29. Beginning at the first hydrant on South Main street, the road was graded and built to the south end of the flat near the Charles Emerson place a distance of 12,800 feet.

Work was then begun at the foot of the hill near Charles E. Stubbs' place and carried north over the top of the hill, a distance

of 2300 feet, leaving a gap between the two pieces of 800 feet, upon which quite an amount of work has been done, such as blasting out the ledge, etc. All except 120 loads of the gravel used in the construction of the first two miles was drawn from near the iron bridge across the South Branch. A long distance and a hard road, making the cost of teams proportionately large. The whole amount of gravel used on this section was 4067 loads, 3107 of which were paid for and 960 loads were taken from the highway limits near the above mentioned bridge for which there was no charge. The gravel for the south end, 1400 loads, was taken from the bank owned by C. E. Stubbs on the Unity road, making the whole amount of gravel used 5467 loads, besides about 300 loads of clay. Twenty six culverts were relaid or built and nearly all renewed with corrugated iron pipe, besides the large cement culvert across the brook. The whole distance built on the Goshen road was 15,100 feet, at the cost of 77 6-10 cents per foot, or \$4097.28 per mile. The cost of tools is not included as the blasting ahead of the ledge and an iron culvert on hand paid for will more than offset the tools.

WALLACE L. REED,	} Selectmen of Newport.
ELMER E. DODGE,	
RUFUS S. DUDLEY,	

REPORT OF Cemetery Commissioners

To the Citizens of Newport:

During the past year six lots have been sold at the Pine Grove cemetery from the sale of which \$144.00 was realized. At the North Newport extension one lot has been sold and \$45.00 received.

The permanent care fund for the Pine Grove cemetery now amounts to \$245.50, and for the North Newport extension \$145.00.

The income only of the above funds can be used in the care of the cemetery from which the fund originated.

During the past year changes in the grade of the Pine Grove cemetery have been made, which it is believed will prevent the collection of surface water near the center of the cemetery, and the town water which had previously been taken just inside the cemetery fence has been distributed in pipes to those sections of the cemetery which will be used first. The expense of this piping, including labor and material, amounted to \$181.88.

Some work which was planned in the Pine Grove cemetery for last summer has been postponed owing to the difficulty in securing help during the summer and fall.

During the past year several hundred tablets in each the Maple Street and the North Newport extension were either righted or reset and cemented, and the same work was done for many stones in the old Pine street cemeteries; the expense of each individual stone in most cases was slight, amounting in all to \$68.98. A little more of this work remains to be done during the coming year. A small amount spent in the old cemeteries in removing old, unsightly heaps of dirt and filling in sunken graves would greatly improve the appearance of these old cemeteries and should be done the coming summer.

The general expenses in the old cemeteries during the past year have been \$203.77, and the expense of burials \$222.00.

As will be seen from the report of the Treasurer of the Cemetery Commissioners, to which you are respectfully referred, there is an unexpended balance on hand, at the close of the year, of \$508.42, of which \$83.00 is available for expenditure in the old cemeteries and the balance for the new cemeteries.

Your Commissioners would suggest that no appropriation be made for the new cemeteries, but that \$500.00 be appropriated for the old cemeteries and for burials.

GEORGE A. FAIRBANKS,	{	Cemetery
JOHN McCRILLIS,		Commissioners.
P. A. JOHNSON.

To the Selectmen of Newport:

In making out the report you will notice I have not made a separate report for work done with the road machine. I began the first of April and continued to the 2d of July with road machine.

Work on Bridges: To raising abutments and building a new bridge on the Kibby road near the Corbin barn, at a cost of \$44.34. To replanking the bridge near Charles E. Stubbs' at a cost of \$70.00. To replanking Dame bridge at a cost of \$41.88. To replanking bridge near the Frank Cutting place, \$8.00. To repairing bridge on the Endicott road, \$15.00. Cement bridge on the George Whitney road, cost of labor and material, \$93.93.

Surface Drains and Sewers: Oak street drain at a cost of labor and material, \$94.60. Surface drain near E. H. Carr's, labor and material, \$25.87. Extending sewer on Main street near the bridge, total cost of labor and material, \$58.70. Received from Electric Light Co., on the above sewer, \$25.00.

STATEMENT

Appropriation for general highways,	\$6,000 00
Paid out during the year ending Feb. 15, 1911,	4,052 32
	<hr/> \$1,947 68

Respectfully submitted,

LIBERTY D. KEMPTON, Road Agent.

Respectfully submitted,

FRED CUTTS, Treasurer.

We, the undersigned, have this day examined the accounts of the Treasurer of the Newport Cadet Band, and find them properly cast and vouched.

E. A. DAVIS,	}	Auditors.
R. E. DENT,		
D. R. GRAVES,		

Newport, N. H., Feb. 14, 1911.

For the past 15 months the band has labored under very adverse conditions. Circumstances over which the organization had no control obliged us to hire a Musical Director from out of town, to make it possible for the band to give the series of summer concerts, also to hire two other extra men to complete the instrumentation.

We secured the services of Mr. C. H. Perkins as Director, and while it was quite expensive, we secured a competent man at a much lower price than we could have elsewhere. At the close of the concert season, owing to the expense, we immediately dismissed him, and were fortunate in securing Mr. A. S. Nelson of Newport as Director at a much more advantageous salary. He is a gentleman of experience and much ability. Under his direction the band has advanced in a marked degree, and by the purchase of a bass horn and a clarinet, at very low prices, the instrumentation has been greatly improved, added to which, increased membership and improved personnel, places the band at this time in a much better condition than for some time past.

We feel it no more than fair that we should explain how much the members of the band receive individually in payment for their services,—52 rehearsals, 15 concerts, soldiers' monument benefit, nothing; Memorial Day, 20 men, \$25.00. Public days, rallies, etc., prices agreed upon. The past year the members have received for all this \$9.50 each, but nothing from the appropriation.

We wish to thank the citizens for their liberality and assure you that it is fully appreciated. Further, we promise if you will continue to do your part we will use every effort to merit your confidence and give you better music and a better band.

Respectfully,

ZEPHRY MORROW,	} Directors.
E. E. HUTCHINSON,	
F. H. JORDAN,

STREET AND SERVICE PIPE EXTENSIONS AND CONNECTIONS

On Oak street a 6 inch main, with two gates and two hydrants, has been laid from North Main street to the river, a distance of eleven hundred and ten (1110) feet, at a cost of ten hundred and twenty-two dollars and seventy-seven cents (\$1,022 77). The expense for 8 house connections to street lines was eighty-eight dollars and sixty-seven cents (\$88 67), making a total cost of eleven hundred and eleven dollars and forty-four cents (\$1,111 44). The Water Commissioners felt authorized to make this extension on becoming assured that the water rental would amount to 8 % on cost of construction. The annual water rental for fixtures now in use is eighty-five dollars, while an additional connected tenement is nearly ready for occupancy, and another house is in process of construction.

ITEMIZED EXPENSE OF OAK STREET PIPE LINE

1,092 feet 6 inch cast iron pipe, or 18 tons	
and 458 pounds, at \$26 70 per ton,	\$492 83

Stable team,	4 00	
Blacksmith work,	3 00	
Labor,	321 26	
	<hr/>	\$1,022 77

WINTER STREET

With an assured water rental which would exceed 8 % on the cost of construction one hundred and eighty-one (181) feet of 1 $\frac{1}{4}$ inch cement lined pipe and eight (8) feet of 1 inch cement lined pipe has been laid on Winter street, east of house owned by Sanford Anderson, at an expense of sixty-seven dollars and fifty two cents (\$67 52).

PLEASANT STREET

From the main pipe line on Pleasant street there has been laid northward, on a staked out street to its terminus, thence on a staked out street westward, 1 $\frac{1}{4}$ inch cement lined pipe for a distance of three hundred and eighty-nine (389) feet, which, with one hundred and five (105) feet 1 inch cement lined pipe, cost one hundred and forty-four dollars and forty-three cents (\$144 43).

SUMMIT ROAD

From the terminus of the 1 $\frac{1}{4}$ inch pipe on street leading south from Summit Road, forty (40) feet of same sized pipe has been laid to furnish service for the house of Ralph H. Tenney.

PINE GROVE CEMETERY

In this cemetery there has been laid seven hundred and forty-one (741) feet 1 $\frac{1}{4}$ inch and forty-six (46) feet 1 inch cement lined pipe, with 6 stand pipes for using hose, the expense being one hundred and eighty-one dollars and eighty-eight cents (\$181 88). The cost of this extension has been paid by the Cemetery Commissioners, and the amount is included in service pipe account of receipts.

CATHOLIC CEMETERY

One hundred and eighty (180) feet 1 inch cement lined pipe with one stand pipe has been laid there at a total cost of fifty dollars and seventy-seven cents (\$50 77). The cost of pipe and fittings is at the expense of the water works. The cost for labor, thirty-two dollars and seventeen cents (\$32 17), has been paid by Rev. J. J. Hogan in accordance with an agreement made with the Water Commissioners.

Thirty-four service pipe connections have been made on the main system, supplying forty-seven tenements; also the Episcopal church, the Finn temperance hall on Sunapee street, and the prospective Finn hall on Winter street.

One connection to a two tenement house has been made on the North Newport system, at a net cost to the town of sixteen dollars and twenty-nine cents (\$16 29).

SUMMARY STATEMENT

Receipts from water rents for the year,	\$7,458 96
Interest on \$50,000 4 % water bonds,	\$2,000 00
“ 20,000 3 % “	600 00
“ 11,600 3 % notes,	348 00
“ 30,000 3½ % balance of cost of system,	1,071 50
	<hr/> \$4,019 50
Total cost of maintenance and repairs for the year ending Feb. 15, 1911,	\$1,261 64
	<hr/> 5,281 14
Net income to town,	\$2,177 82

The foregoing figures show the cash receipts from water rents to have been sufficient to pay interest charges on the entire cost of the system and all expenses for maintenance and repairs for the year, and leave a balance in favor of the town of twenty-one hundred and seventy-seven dollars and eighty-two cents (\$2,177 82), while the town gets its water for hydrant service, flushing of sewers, watering troughs, town hall, school buildings, library and library house, Carrie F. Wright Hospital, engine house, Maple Street, Pine Grove and Catholic cemeteries and street sprinkling without expense.

With one exception all houses on the Guild line have service pipe connections. The annual water rental on fixtures now in use amounts to three hundred and sixty-nine dollars and fifty cents (\$369 50).

GILMAN POND

Your board are pleased to state that notwithstanding the decreasing annual rainfall, the water in the gate chamber has not been less than three feet in depth at any time during the year. In the month of June it was at high water mark.

Through the courtesy of Mr. E. C. Vose, weather forecaster, of Concord, N. H., we have the official record of the monthly and yearly rainfall in central New Hampshire for the past sixteen years. The following condensed summary is of interest:

Average annual rainfall for four years, 1895 to 1898,	43.56 inches
“ “ “ “ 1899 to 1902,	39.77 inches
“ “ “ “ 1903 to 1906,	37.67 inches
“ “ “ “ 1907 to 1910,	31.68 inches

For the past three years the average yearly rainfall has been but 29.12 inches.

NORTH NEWPORT

One connection to a two tenement house has been made at a net expense to the town of sixteen dollars and twenty-nine cents (\$16.29). The cost of that system is now \$1,289.44.

Water rents received for year ending Feb. 15, 1911, \$51 75

This amount is included in the sum total of water rents paid into town treasury.

The board of Water Commissioners would respectfully recommend the laying of a 6 inch water pipe from the junction of Maple and Cross streets to the junction of Maple street and Bradford road, with a hydrant at that point; thence supplying Broad View, so called, with water through a smaller pipe.

Respectfully submitted

JOHN B. COOPER,	{	Board of Water Commissioners.

SEWER CONSTRUCTION

In accordance with the votes of the town at the annual town meeting, March 8, 1910, the following described lines of sewer pipe have been constructed:

LAUREL STREET EXTENSION

From a point a few rods west of house owned by Kirk D. Smith along Laurel street extension to South Main street, a distance of three hundred and seventy-five (375) feet, at a cost of one hundred and fifty-four dollars and fifty-one cents (\$154 51).

MAPLE STREET

From a point between houses owned by Mrs. Alfred Clark and Mrs. Henry Jourdan westerly on Maple street to Cross street, and thence on Cross street to Sugar river, a distance of about nine hundred and twenty (920) feet, at a cost of three hundred and eighty-one dollars and sixty-five cents (\$381 65).

SUMMIT ROAD BRANCH

From a point east of house owned by Ralph H. Tenney northward to the sewer line on Summit Road, a distance of two hundred and eighty-six (286) feet, at a cost of two hundred and fifty-nine dollars and twenty-six cents (\$259 26).

In addition to the above named sewer lines the Sewer Commissioners have constructed the following described mains without express authority from the town.

CROSS AND CANAL STREETS

After the sale of the property of the Newport Power and Building Company, wishing to improve sanitary conditions, which were very bad, the W. H. McElwain Co. and the D. Richards & Sons Co. requested the Sewer Commissioners to lay a sewer pipe from a point on Cross street southerly to Canal street, thence along Canal street to a point northwest of the shoe factory, and thence to the river, at the expense of the before named companies; with the understanding that the matter should be brought up at the next annual town meeting, and with the expectation that the town would vote to reimburse them for this outlay, after which the before named parties were to pay regular entrance fees for sewer connection. This line was a part of the Gustine system as shown on the engineer's plans of survey.

A 6 inch sewer pipe was laid from a point opposite the Richards houses on Cross street, on the lines before described, to the river, a distance of seven hundred and fifty-eight (758) feet, at a cost of three hundred and seventy-one dollars and sixty cents (\$371 60). After all the houses owned by the before named parties had been connected with this sewer (fourteen tenements) and the remaining unsupplied houses had been connected with the town water system, it seemed to the Board of Sewer Commissioners a more simple and better plan to allow the W. H. McElwain Co. and the D. Richards & Sons Co. to pay regular entrance fees instead of cost of construction. The parties named agreed to this arrangement, and this line becomes a part of the main system.

BASE BALL GROUNDS, PLEASANT STREET

The section of land on the north side of Pleasant street, formerly used as base ball grounds, having been sold in house lots, with streets staked out, the Water and Sewer Commissioners were urged to lay sewer and water pipes. Having been assured by responsible parties that certain improvements would be made upon

the club house, and that a two tenement house would immediately be erected, from which buildings an annual water rental would be received exceeding 8 % on the combined cost of water and sewer pipe construction; and inasmuch as such construction would furnish facilities for water and sewer connection to several other lots when built upon; and also an opportunity for sewer connection to three houses near the west end of Pleasant street, the Sewer Commissioners felt justified in putting in this branch. Beginning at a point in the middle of a staked out street just south of the new two tenement house erected by Messrs. Forehand & Robinson, running westerly, thence southerly across land of L. R. Bascom and land of Dr. J. L. Cain, and entering the Pleasant street sewer, west of the so called Boardman barn. The distance is about five hundred and ninety-six (596) feet, and the cost was one hundred and ninety-four dollars and six cents (\$194 06).

The Commissioners hope that their action in these two cases may meet with your approval.

SUGGESTIONS

The sewer pipe on Cross street should be extended northward about two hundred (200) feet and an automatic flush tank be constructed. Flush tanks should also be constructed on Maple street; also on or near Summit Road and at the head of the new Pleasant street branch. The entire cost would not be far from four hundred dollars (\$400.00).

REPORT OF BOARD OF HEALTH

To the Citizens of Newport:

During the past year there have been quite a number of cases of diphtheria in the town, not located in any one section throughout the town. It has been impossible for the board to locate the exact cause of the disease. The different cases were investigated to find, if possible, the start of the disease, either in the milk supply or other source, but as far as examined these were found in a satisfactory condition. By strict quarantine and using the most careful and thorough measures, in the final fumigation, the board has dilligently tried to stamp out the disease. The board has investigated numerous complaints as to existing nuisances, and in two cases it was necessary to bring legal process to bear before the trouble was abated.

Under instruction from the State Boord of Health the local board has furnished considerable assistance to families in quarantine, especially to such families as could not obtain the necessities of life without, as the State Board writes, "extraordinary hardship to themselves, but the local board is not expected to help those who are amply able to pay their own bills." The local board has tried faithfully to follow out these directions, and has given especial attention and consideration to each individual case.

Respectfully submitted,

A. C. BRADLEY,	}	Board of Health.
J. L. CAIN, M. D.,		
JOHN R. KELLY,		

SCHOOL REPORT

To the Honorable School Board of Newport:

The report of the Superintendent of Schools is an open letter to the School Board. It should set forth the actual condition of the schools, and should make recommendations for their improvement. It should deal with facts, and should therefore be frank.

I began my duties as Superintendent, October 5th, and I found a very genuine pleasure in the unusual experience, to a school man, of being asked to return after an interval of nine years, to his first field of labor. I am deeply sensitive of the confidence thus expressed. I found a field ripe for work, and we may already report progress in several lines.

The first condition for efficient schools is regular attendance. I have spoken and written at some length in regard to this matter upon several previous occasions. But I must reit-

Attendance

erate that attendance on the whole is far from good and that tardiness has grown to demoralizing proportions. We are struggling with the evils as best we can. But we must have the support of parents. It is certain that many of our cases of absence and nearly all of the very many cases of tardiness are unnecessary. It is presumed that most parents are enough interested in the welfare of their children to get them to school on time and to keep them there unless there is some very good reason for not doing so. It is also expected that parents will not complain when their children are asked to make up time unnecessarily lost. I cannot overemphasize the need of vigorous oversight in this matter. I trust that hereafter we shall see an effort on the part of each conscientious parent to let nothing but health considerations stand in the way of the perfect attendance of his child. There are always some few parents who will be negligent in this matter, either because of shiftlessness or because they wish their children to be earning money. These people must be made aware that New Hampshire has a compulsory school law.

The second condition for good schools is efficient teaching. And at the bottom of efficient teaching lie enthusiasm, love of the work, willingness to work *hard* and *long*, for these are, except in the case of a genius, the price of success in the classroom. There is no substitute for work. But enthusiasm must be directed by wisdom. So we must have trained enthusiasm. I do not say that this training can be had only in a normal school,

**Efficient
Teaching**

for there are many very efficient teachers who may never have seen the inside of a normal school, and, I regret to say, there are some normal trained teachers who are absolute failures. What I do say is that the trade must have been learned somewhere. These are the days of the specialist. Teaching is specialized labor no less than plumbing or the practice of law or medicine. The science of education cannot be learned by the pursuit of general knowledge. One must study the thing itself. So, other things being equal, the trained teacher is incomparably more skillful than the untrained one. We have at present a number of normal graduates among our teachers, and some of those who have not had normal training are doing efficient work. But we must im-

Recommendation

I

prove the efficiency of the force as a whole by increasing the number of "approved" teachers in service, and thus fostering the growth of a professional attitude toward the work. It should be our intention to employ only certificated teachers, and I recommend that in filling future vacancies this be our policy.

This brings me to a discussion of teachers' salaries. Much is said in these days about "the high cost of living." And the members of one great political party tell us that we should not be disturbed by this increased cost, because wages have likewise gone up, and while things cost more than they used to cost, we have more money with which to buy than we used to have.

**Teachers'
Salaries**

This may be so with carpenters, plumbers, masons, etc.; but it certainly is not true with most teachers. Salaries have not kept pace with the increased cost of living. Board and room which twelve or fifteen years ago cost \$3.00 or \$3.50 now cost \$5.00 or even \$6.00, while teachers' salaries remain in most cases practically the same.

It would seem that in the economy of things, a skillful teacher,—a worker in human stuff,—would render a service as valuable as that of the mill operative or the servant girl. A teacher whose salary is not more than ten dollars a week is not as well provided for financially as a worker in either of these two classes. I find that

many young women employed by various manufacturing concerns are earning from \$8.00 to \$15.00 a week, while girls doing housework earn from \$4.50 to \$6.00 a week, which, being clear money, gives them a better revenue than \$10.00 gives a teacher. And it must not be overlooked in this connection that a teacher's position requires that she be always well dressed. This means far larger clothing expense and larger laundry bills than these other classes have to meet.

My position here can be very briefly put. It is this. An experienced teacher who is not *worth* more than \$8.00 or even \$10.00 a week is not worthy to be continued in service. If she is worth more than \$10.00, she ought to have it. I recommend a uniform and graduated salary schedule with a maximum commensurate with efficient service and sufficient to attract "approved" teachers, and to keep good teachers when we have them.

Recommendation II

A consideration of teachers' salaries leads me naturally to inquire if at present we are spending our money to the best advantage. And so I come to the question of the number of grades necessary to fit children to do high school work or to give those whose formal education stops with the grammar school the elementary means of earning a living. I asked why the ninth grade had been added to the course in Newport, and was told that without this grade the high school was not able to do its work in four years. If this were so, there must have been something the matter with the teaching in the high school. The remedy should have been sought there. If, however, the demand for a ninth grade came because the high school found its entering class unprepared for high school work, then the remedy lay not in giving the children more of the same kind of work which had failed to prepare them, but in discovering where and why this proper preparation had not been made.

Is a Ninth Grade Necessary?

I found the present ninth year class lamentably below grade. I am therefore forced to conclude that the work in grades below the ninth has been either of the wrong sort or insufficient in amount. And not only are these children below grade, but I find that their average age when they entered the grade last September was fourteen years and eleven months, so that they will be practically sixteen when they enter the high school, and twenty when they graduate. This is entirely wrong. We have no right to hold pupils in school until they are twenty years old and get them no farther than the end of a high school course. The work below the high school can be done, and well done, in eight years. New York

City public schools have but eight grades, and the New Hampshire state course of study provides for only eight years; while in the Horace Mann School, in New York, and in all the public schools of St. Louis, the work is done in seven years. I trust I may not seem to have taken leave of my modesty when I say that we will promise to give your children a better education in eight years than they have been getting in nine.

Therefore, I recommend that after next year the grammar school course be cut to eight years, and that the kindergarten which now occupies very unsatisfactory quarters be put into the new primary building, this being made possible by the removal of the sixth grade to the Richards building. This change may even be made next September, if the people desire it.

Recommendation III

I find that the work of your schools has been extremely one-sided. In many grades it has been almost entirely receptive, with practically no expression whatever, oral, written, or manual. The lack of ability to express would perhaps be one of the first characteristics to strike an expert upon visiting your schools. Impressions are of little value unless they work themselves out in expression of some sort. We

A One-sided Education

shall attempt to develop the power of expression, and to multiply the means which the child may use. One of these means of expression, is drawing. No argument is needed in these days to convince people of the need of drawing in the schools. By cutting off the ninth grade we should save money enough to enable us to combine with some other town with a view to ob-

Recommendation IV

taining the services of a special teacher of drawing. And I recommend that measures be taken at once to see if some such arrangement can be made.

I found the schools very poorly equipped with textbooks and apparatus. There were scarcely any good wall maps in the whole town, below the high school. Every classroom above the third grade should have a good globe, a good map of the world, and a good map of each continent studied in that grade. There should also be many special maps for use in history.

Equipment

Geography and history may be *talked* about, but they cannot be *taught* without the use of globes, maps, charts, etc. These things cost money. A first class map of the world costs \$6.75, but if taken care of, it will last for years, surely until it is out of date.

I fear school materials have not always been properly cared for. I found no record kept of textbooks delivered to the various grades, in fact I found town books in circulation with neither stamp nor paster to show that they were town property. I found children were not properly charged with textbooks in their possession, and certain it is that these books were not well cared for by the children. These things are being looked after. Books are stamped, numbered and dated. It will be possible to look at books in use and tell at once when they were new. These and apparatus are charged to the rooms to which they are delivered and the books are then charged to the pupils into whose hands they go. If lost or unnecessarily injured, they must be paid for. I expect to save one half of what I actually cost the towns of Newport and New London by judicious purchase and economical use of textbooks and supplies. But we must have proper equipment. We can't do the work without it. So my policy will be to equip the schools as thoroughly and as rapidly as the generosity of the taxpayers will permit. Advocating the strictly business management that I do in these matters, I feel no hesitancy in asking for all necessary apparatus.

When I came in October, I found a very marked dearth of interesting reading material in the schools. The power to read constitutes the main element in our educational scheme. It is useless to ask a child to do independent work in history, geography, or even in number, until he can read. And it is of course understood that by the power to read I mean much more than the ability to say the words. Believing the road to good reading is made shorter and smoother by the use of interesting material, a careful course has been planned and much money has been spent in the purchase of sets of books to put it into operation. These books should last and remain in good condition for from four to eight years according to grade in which they are used. The course is given on another page.* It will be noticed that an attempt has been made to construct a balanced course, the objects being to increase knowledge and to cultivate the child's taste. The material falls under the heads of general literature, history, geography, and nature study. Under general literature are included many of the myths, folk stories and masterpieces of fiction that constitute the culture of the ages. Children bred on such a course will have a fund of general information and breadth of vision that can be gotten in no other way. And it is safe to say that some few at least will have acquired a reading habit which will last through life. A new system of teaching beginners to read has been put into operation in the first grade, and it is hoped that results will justify its adoption.

* The course is omitted because of insufficient time to prepare for the printer.

Much difficulty has been encountered in the first grade this year because of the size of the class and the immaturity of many of the children. There is no advantage gained

First Grade

by allowing children not sufficiently mature to enter the first grade, since they are merely obliged to remain there a second year, and have the disadvantage of understanding very little of what is going on, which leads directly to habits of inattention hard to overcome. These children are far better off in the kindergarten, where the work is adapted to their comprehension. I therefore recommend

Recommendation

V

that children under six years old shall not be admitted to the first grade except after attendance at the kindergarten and upon the recommendation of the kindergarten teacher.

A systematic course in business penmanship has been introduced in all grades above the second. We expect to teach the children to write an *easy, rapid and legible hand*, and this is what is being done in very few public schools.

The situation at Guild presents a serious problem. The building is in a disgraceful state, not only because it is out of repair but because of its sanitary condition. It is impossible for children in that school to be taught as they should be under the present congestion of numbers and grades. I

Guild

therefore recommend (1) that sufficient money be spent there to renovate the building thoroughly; (2) that the upper part of the building be finished and equipped with schoolroom furniture, and the four upper grades be put into it; (3) that a second teacher be hired to handle the lower grades in the present room.

Recommendation

VI

Or, I recommend what would probably be a cheaper solution and one undoubtedly offering better educational advantages, viz., the putting of the building into first-class condition, occupying only the lower room for school purposes and transporting the two upper grades to Newport. This means expense. But it is better economy than to continue there as at present. I should like, with a fair financial support, to show at Guild what can be done toward making an ideal rural school.

All schoolrooms should be clean and attractive, with appropriate decoration. We are, in many rooms, decidedly lacking in this latter respect. The rooms of the new primary building, while modern in arrangement, are bare and unattractive. It is hoped that during the next summer vacation, the walls of these rooms

will be tinted, and picture moldings put up, so that an attempt at decoration may be made. Our outlying school buildings must be made more attractive both inside and outside. A schoolroom above all other places should be beautiful.

Teachers' meetings have been held regularly on the first Wednesday of each month, at which have been discussed matters of classroom detail and of general educational doctrine. In addition to these regular meetings, a number of group meetings have been held to deal with group interests. At these meetings, as at all other times, the teachers have been generous in their co-operation and have manifested an earnest desire to carry into effect new measures calculated to advance school conditions. And to them I give my thanks.

Some portions of this report may seem somewhat severely critical, but I am not satisfied with fair schools, neither are you. We want efficient schools,—schools in which children are being taught to do in a cheerful and expeditious manner the many daily tasks that come to all of us.

Respectfully submitted,

GEORGE W. DICKSON.

SCHOOL WARRANT

STATE OF NEW HAMPSHIRE

To the inhabitants of the school district in the town of Newport qualified to vote in district affairs:

You are hereby notified to meet at the town hall in said Newport on Saturday, the 25th day of March, 1911, at one o'clock in the afternoon, to act upon the following subjects:

Article 1. To choose a Moderator for the year ensuing.

Art. 2. To choose a Clerk for the year ensuing.

Art. 3. To choose a member of the School Board for the ensuing three years.

Art. 4. To choose a Treasurer for the year ensuing.

Art. 5. To choose Agents, Auditors and Committees in relation to any subject embraced in this warrant.

Art. 6. To hear the reports of the School Board, Treasurer, Agents, Auditors, Officers and Committees heretofore chosen or appointed, and pass any vote relating thereto.

Art. 7. To see what sums of money the district will vote to raise and appropriate for building and repairing such school houses and outbuildings as the needs of the district require, and provide suitable furniture and apparatus and needful convenience therefor, and pay for the insurance on the property of the district from loss by fire, and for the support of schools, and pass any vote relating thereto.

Art. 8. To transact any other business that may legally come before the meeting.

Given under our hands and seals at Newport, this 8th day of March, A. D. 1911.

GEORGE A. FAIRBANKS, } School Board
GEORGE E. LEWIS, } of Newport.
